EXPERIENCE

July 2022 - Current

Senior Consultant, Pricewaterhousecoopers Pvt Ltd | Ahmedabad, India

- Lead end-to-end preparation of Detailed Project Reports (DPRs) covering technical feasibility, cost estimation, financial modelling, risk analysis, and phased implementation strategies for urban mobility and ITS projects.
- Structure and draft Expressions of Interest (EOI), Request for Proposals (RFP), bid documents, concession agreements inputs, and Service Level Agreements (SLAs) ensuring compliance, transparency, and competitive procurement.
- Design robust technical and financial evaluation frameworks; support government agencies through pre-bid meetings, query management, bid evaluation, and award recommendation processes.
- Provide contract management advisory including performance monitoring frameworks, KPI definition, milestone validation, change order assessment, and dispute mitigation support.
- Advise on architecture and integration of ITS, Traffic Management Centers (TMC), Integrated Command & Control Centers (ICCC), AVL, AFC, and digital mobility platforms.
- Manage cross-functional consulting teams and coordinate with senior government stakeholders to ensure timely, high-quality project delivery.

June 2013 - June 2022

Senior Consultant – ITMS | Amnex Infotechnologies Pvt. Ltd. | Ahmedabad, India

- Prepared technical presentations, demonstrations, and RFP responses, showcasing product capabilities aligned with client needs.
- Assisted in cost estimation and project scoping to support sales proposals, and client negotiations.
- Project management and client coordination for implementation of projects.
- Worked closely with sales and business development teams to design customized IoT-enabled solutions for urban mobility.
- Coordinate cross-functional internal team's members, vendor in acquiring timely outcomes.
- Coordinated with development, QA, and operations teams to ensure the timely delivery of IoT modules for urban transport.
- Monitored project progress and worked proactively to mitigate risks and resolve impediments.
- Led end-to-end implementation phases, including installation, integration, and system testing at client locations.
- Analyzed system workflows and data feeds from deployed IoT devices to identify bottlenecks and improve efficiency.
- Suggested process automation and system upgrades to enhance real-time data analytics in urban mobility projects.
