Roles & Responsibilities:

Project Execution & design co-ordination:

- Led end-to-end execution of ICT and ELV systems including CCTV, ACS, FAS, PA, Wi-Fi, IP Telephony, CUPPS, CUSS, E-Gates, FIDS, IBS, TETRA, and more.

- Collate drawings and documents from Design team required for submission to statutory authorities,
- Collaborate with cross-functional teams including engineers, designers, contractors, and clients to define project requirements, objectives, and deliverables.
- Provide technical expertise and guidance to project teams on the design, installation, testing, and commissioning of fire protection, security, safety, and ELV & ICT systems
- Foster a culture of safety, quality, and continuous improvement within the project team, ensuring compliance with relevant regulations, codes, and standards.
- Act as the primary point of contact for clients, consultants, and regulatory authorities, addressing inquiries, resolving issues, and maintaining positive relationships throughout the project lifecycle.

Project Billing:

- Verify contractor bills and submit them to the Project Head for approval.
- Check and process daily NMR / DLR (Daily Labour Report) bills and Joint Measurement Sheets (JMS) to ensure accuracy and timely submission.

Customer Relationship Management:

- Take overall responsibility for identifying, tracking, and ensuring timely rectification of snags during the project closure phase.
- Oversee and monitor the flat handover process in coordination with team members, ensuring quality standards and customer readiness are met.

People Management:

- Foster team building and promote a collaborative work environment.
- Build and maintain strong, professional relationships with contractors and vendors to ensure smooth coordination and execution.
