Designation: Sr. Manager Pre-Sales/ D&E

Roles & Responsibilities:

- Engage with clients to understand their needs and design tailored solutions with technical teams.
- Oversee solution design, prepare accurate cost estimates, conduct cost-benefit analysis, and allocate resources for successful delivery.
- Lead bid strategy, prepare RFP responses, write detailed proposals, and coordinate with internal teams for timely tender submissions.
- Select vendors, negotiate terms, and ensure product quality, pricing, and delivery alignment with client requirements.
- Deliver technical presentations, product demos, and client workshops to showcase solution feasibility.
- Collaborate with sales teams, provide training, and share market insights to align solutions with customer needs and sales goals.
- Ensure smooth project transition post-bid, address client queries, and participate in contract negotiations.
- Monitor bid success rates, track performance, and report on progress, identifying areas for continuous improvement.
- Ensure proposals and designs meet industry standards, client specifications, and regulatory compliance.
- Lead cross-functional teams, mentor junior consultants, and ensure cohesive execution of pre-sales strategies.

Organizational Experience

Sep'2010 to Jan'2017 – Crompton Greaves Limited

Company Profile: Established in 1937 a leading engineering conglomerate headquartered in Mumbai, India. The company specializes in electrical engineering, offering a diverse portfolio of products, solutions, and services for power and industrial equipment. CG's offerings include power and distribution transformers, switchgear, circuit breakers, vacuum interrupters, and network protection and control gear.

Designation: Manager Pre-Sales/ D&E

Roles & Responsibilities:

- Engage with clients to understand their business needs, technical requirements, and project objectives.
- Analyze and document customer requirements, translating them into technical and functional requirements.
- Design technical solutions tailored to client specifications, which may include hardware, software, and integrated systems.
- Identify integration points with existing systems and propose interoperability with third-party solutions.
- Evaluate different products, vendors, and technologies to recommend the most suitable solutions.
- Conduct cost-benefit analysis of potential solutions to ensure alignment with budgetary constraints and ROI expectations.

- Stay updated on new technologies, tools, and industry trends to enhance solution offerings.
- Develop detailed cost estimates, including hardware, software, labour, and service costs.
- Lead and coordinate bid responses for RFPs, RFIs, and RFQs from clients.
- Review tender documents to ensure technical compliance with client specifications.
- Collaborate with sales, engineering, and project teams to gather inputs for bid documents and ensure alignment with client expectations.
- Use effective communication and presentation skills to illustrate the solution's value proposition to decision-makers.
- Support the sales team by aligning solution proposals with strategic goals.
- Educate and equip the sales team with technical knowledge to effectively sell and position the proposed solutions.
- Provide relevant technical documentation, brochures, and case studies to support the sales team's efforts.
- Address client queries, make adjustments to proposals, and update bid documents as needed during the evaluation phase.
- Participate in pre-contract negotiations to ensure client satisfaction and clarity on project scope, timelines, and deliverables.

Organizational Experience
