Project – CGSWAN/ CHiPS

Technical Skills cum Experience

Smart City & Urban Systems

- Integrated Command & Control Center (ICCC).
- Integrated Traffic Management System (ITMS).
- Adaptive Traffic Control System (ATCS).
- City Surveillance, ANPR, RLVD, Spot Speed, VMS, PAS.
- IoT Sensors & Smart City Platforms.
- System Integration & Interoperability

Data Center

- Managed Infrastructure Stability along with equipment installation and Maintenance.
- OS Installation, VM Creation.
- Application Deployment Activity with Various OEMs like NMS/EMS, ITMS, ATCS, Smart City Platform etc.
- Understanding of remote administration through Telnet, SSH.
- Network Architecture changes as per the
- Switch configuration including VLANs, Routing.

Networking

- Troubleshooting and Issue Resolution, Security Implementation.
- Installed routers switches and wireless controllers.
- Disaster Recovery Planning with compliance and auditing.
- Understanding of remote administration through Telnet, SSH.
- Collaborated with cross-functional teams to plan and execute upgrades and expansions, ensuring scalability.

Security

- Sophos end point Security installation and commissioning on Windows client.
- Sophos end point Security installation and commissioning on Linux client.

PHP

- Building a variety of different web applications and sites.
- Created custom portals and websites that is useful for our organization.
- Deployed and maintained systems in XAMPP (MySQL) environment.
- Relevant experience in web applications using PHP – Codeigniter.
- Relevant experience in design database tables in MySQL.
- Good understanding of MVC Model View Controller.
- Good Working knowledge of Bootstrap framework.

Xampp Server

- Knowledge of installing xampp in Windows based system.
- Import and export the database from the server.
- Managing xampp server(apache, tomcat)

Windows/ Windows Applications/MS Office

- Working Experience in windows XP, Windows 2003,2007,2008,2010,2011.
- Windows server 2019.
- Experience in installing appropriate system and application software.
- Experience in solving problems connected to the network and the systems.
- Experience in monitoring the storage, network traffic and efficiency.
- Experience in working with windows software's.
- Experience in working with MS Office package 2007, 2013,2021.
- Advanced troubleshooting of complex problem with MS and other applications.

Linux Distribution

- Installation knowledge of Ubuntu desktop, and application software.
- Use of terminal.
- Basic knowledge of software configuration and installation.
- Basic troubleshooting in networking.
- Debian based beagle bone installation & configuration.

Cisco/Polycom VC End Point

- Experience in installing, configuring and testing various model of cisco video conferencing cameras like, cisco sx10, cisco sx20 and cisco sx80 camera.
- Work experience in installing Polycom desktop as well as Polycom video endpoint solutions.

Work experience

Apr 2025 – Present, Consultant

- Providing technical and project advisory support for Smart City, ICCC, ITMS, and urban digital infrastructure initiatives for government clients.
- Reviewing and validating project plans, BOQs, and technical compliance for smart city and ICT projects.
