Educational Qualification/ Technical Skills

- ✓ **M.B.A** from **Indira Institute of Business Management**,(2009-11) Mumbai.
- ✓ **Engineering (Computer Science)** from **P.E.S.I.T College of Engineering**, Bangalore, in Jan 2008.

Certifications:

ITIL, ISO27001 lead auditor, Prince 2

Professional Experience:

Organization	:	Choice Consultancy Service Pvt Ltd
Duration	:	19 th Jan. 2026- Till Date
Designation	:	Project Manager
Organization	:	Technosys Integrated Solution Pvt Ltd
Duration	:	18 th Nov. 2024- 30 Nov 2025
Designation	:	Project Manager
Organization	:	KPMG
Duration	:	1 th June'23–31 st July 2024
Designation	:	Consultant
Organization	:	Ernst &Young LLP
Duration	:	21 st May2022-31 st May'23
Designation	:	Sr. Consultant
Organization	:	Amnex Info technologies PVT LTD
Duration	:	16 th Oct. 2019- Nov 2021
Designation	:	Project Manager
Organization	:	PwC India Pvt Ltd
Duration	:	26 th March2018-&7 th June 2019
Designation	:	Senior Consultant
Organization	:	Planet Infra Pvt Ltd
Duration	:	11 th March2017-24 th March2018
Designation	:	Project Manager
Organization	:	SS infrastructure services
Duration	:	August 2013- June 2016
Designation	:	Project Manager
Organization	:	Spanco(I) Pvt Ltd
Duration	:	MARCH2011-APRIL 2013
Designation	:	Consultant

A	Name of assignment or project:	Cloud Based CCTV, Video Storage and centralized CCTV surveillance across 73 Factory in AP
	Objective:	Jan 2026- Till date
	Designation:	Operational Manager
	Year:	Cotton Corporation of India
	Client:	Cotton corporation of India, Belapur, Mumbai
	Location:	Cotton corporation of India, Kalamboli, Mumbai
Main Brief Features: It will provide a secure cloud-based CCTV surveillance system across 73 factories in Andhra Pradesh for centralized real-time monitoring.		
Activities Performed: • Execution of Integration of 1054 CCTV camera at 73 location of AP and streaming at command and control center. • Led end-to-end implementation of centralized CCTV monitoring systems for multi-site networks, ensuring real-time visibility, synchronized alerts, role-based access, and command-center integration for operational efficiency. • Planned and executed data migration from factory DVR/NVR hard disks to centralized servers/cloud VMS, ensuring zero data loss and verified data integrity. • Managed Command & Control Center integration, including video wall setup, operator workstations, and live streaming from multiple factory locations. • Configured and optimized storage and application in cloud servers with defined retention policies and backup mechanisms. • Lead development of centralized Video Management System software. • Manage Agile/Scrum project execution. • Monitor project progress, budgets, schedules, and quality standards. • Coordinate with stakeholders, OEMs, vendors, and clients. • Coordinated network infrastructure, including static IP setup, ISP liaison, bandwidth assessment, and RTSP/VMS configuration for seamless remote access. • Ensured 24x7 operational uptime and security compliance, implementing SOPs, access controls, disaster recovery planning, and detailed technical documentation		
A.	Name of assignment or project:	• CCTV surveillance across 53 locations in lucknow city. • Intelligent Traffic Management System(ITMS) across 155 junctions • 32 CCTV for environment Pollution monitoring • DC/DR Management
	Objective:	The objective of the project is to develop an integrated Urban Mobility and Road Safety Cluster in Lucknow by promoting technology-driven enterprises and coordinated institutional mechanisms. The project aims to strengthen a cluster of solution providers, startups, enforcement agencies, service operators, and technology firms engaged in crime prevention, traffic regulation, intervention services, information management, and enforcement systems. Through enterprise development, capacity building, and technology adoption.
	Designation:	Project Manager, TSSPL
	Year:	Dec 2024- Nov 2025
	Client:	Lucknow Smart City Limited(LSCL)
	Location:	Lucknow, UP

	Activities performed. - Led end-to-end planning, scheduling, and execution of integrated CCTV, ITMS, and environmental monitoring systems across Lucknow city. - Coordinated with Municipal Corporation, Traffic Police, Pollution Control Board, System Integrators, OEMs, and Telecom providers for seamless implementation. - Supervised detailed site surveys for 53 CCTV locations and 155 traffic junctions, ensuring feasibility of power, OFC connectivity, pole mounting, and civil readiness. - Managed integration of all surveillance feeds into a centralized ICCC/Control Room with video wall, VMS, analytics engine, and data storage systems. - Oversaw installation of adaptive traffic signals, ANPR, RLVD (Red Light Violation Detection), speed detection systems, and ensured synchronization across junctions. - Ensured deployment of 32 CCTV-linked environmental monitoring systems integrated with pollution sensors for real-time data capture and reporting. - Architected primary DC and DR infrastructure with server virtualization, SAN storage, redundancy, and replication ensuring high availability and business continuity. - Planned OFC backbone/MPLS connectivity, VLAN segmentation, QoS policies, and secure VPN links between junctions and Command & Control Center. - Implemented firewall policies, encryption, RBAC access control, and secure video/data transmission aligned with government IT security standards. - Monitored OFC laying, network redundancy, server configuration, cloud/NVR storage, and ensured 99%+ uptime and SLA compliance. - Ensured adherence to technical specifications, RFP standards, safety norms, and regulatory guidelines. - Conducted FAT/SAT, system testing, analytics validation, and phased commissioning of CCTV and ITMS infrastructure. - Established SOPs, trained control room operators, and monitored AMC performance for sustained operations.	
B.	Name of assignment or project:	PMU for TIDCO, Chennai, Tamilnadu
	Objective:	The PMU is established to support TIDCO in delivering its strategic industrial and infrastructure development mandate for Tamil Nadu by providing dedicated project management, oversight, coordination and advisory services
	Designation:	ICT Expert, KPMG
	Year:	June 2023-31st July 2024
	Client:	TIDCO
	Location:	Chennai, Tamilnadu

	Activities Performed: - Conducts technical and financial feasibility analysis of proposed industrial projects. - Designs project framework, timelines, and implementation strategy. - Prepares financial models and advises on funding sources and investment plans. - DPR preparation, RFP design, bid evaluation, implementation of Airstrip for Sular Airport. - Ensures projects meet government policies, legal requirements, and statutory approvals. - Acts as a link between government bodies, private investors, and other partners. - Provides expert advice on technology selection and infrastructure planning. - Assist in DPR, RFP, and tender documentation - Organize review meetings, prepare agendas, MoMs, and follow-ups. - Preparation of Procurement Strategy and Plan aligned with project objectives - Packaging of contracts (EPC, Design-Build, Supply, IT Systems, O&M etc.) - Preparation of cost estimates and budget validation - Risk assessment and mitigation planning
--	---

C	Name of assignment or project:	PMU Unit for Amritsar Smart city
	Objective:	The project focus on improving urban infrastructure, mobility, waste management, and citizen services using technology, while preserving the city's cultural heritage and enhancing quality of life
	Designation:	ICT Expert, Ernst & Young
	Year:	May 2022 - May 2023
	Client:	Amritsar Smart City Limited(ASCL)
	Location:	Amritsar
	Activities Performed: • Planning, design, and implementation of surveillance systems and ITMS solutions, wifi and Kiosk system. • Conduct site surveys and risk assessments to identify surveillance needs and vulnerabilities. • Design system architecture including CCTV layouts including the ITMS solutions, network integration, and storage solutions. • Evaluate vendors and technologies to recommend cost-effective and reliable solutions. • Ensure compliance with local regulations, cyber security standards, and industry best practices. • Provide advisory support during installation, integration, and commissioning phases. • Develop documentation including technical specifications, proposals, and compliance reports. • Prepare the SLA report for the Golden Temple wifi and Kiosk Sytem • Train the stake holders on system operation, maintenance, and best practices. • Evaluating scalability and upgrades for long-term security infrastructure planning • Prepared detailed technical specifications, BOQ, network diagrams, storage sizing calculations, and compliance matrices for large-scale surveillance deployments. • Designed high-availability DC-DR infrastructure with server virtualization, SAN/NAS storage, clustering, failover mechanisms, and replication strategy. • Architected OFC/MPLS backbone connectivity, VLAN configuration, QoS implementation, bandwidth optimization, and redundant network topology for uninterrupted video transmission. • Defined recording policies, compression standards (H.264/H.265), frame rate optimization, and tiered storage architecture to ensure performance and cost efficiency. • Implemented firewall rules, encrypted video streaming, secure VPN access, role-based access control (RBAC), and compliance with IT security standards. • Designed scalable architecture capable of supporting future camera expansion, implemented health monitoring tools, SLA tracking, and ensured 99.9% system uptime.	
D	Name of assignment or project:	Davanagere Smart city solutions with ICCC platform with DC/DR
	Objective:	The objective is to establish a secure, smart and integrated urban transportation and public-safety framework in Davanagere by deploying a city-wide CCTV surveillance network together with an Intelligent Transport Management System (ITMS),Public announcement, thereby improving traffic efficiency and enhancing citizen safety.

	Year:	2019-2021
	Designation:	Project Manager, Amnex Infotechnologies
	Client	DSCL
	Location:	Davanagere, Karnataka
	Activities Performed: • Site Survey, installation, testing, and commissioning of ITMS components such as ANPR, RLVD, Detectors, e-Challan systems, and CCTV surveillance infrastructure. • Coordinate fiber laying, network setup, command & control centre, and system integration activities • Maintain project documentation — technical specifications, BOQ, As-Built Drawings, FAT/SAT reports, UAT certificates, and closure reports. • Design and develop VTPIS software and smart Parking. • Managed integration of all surveillance feeds into a centralized ICCC/Control Room with video wall, VMS, analytics engine, and data storage systems. • Oversaw installation of adaptive Fixed,PTZ camera at traffic signals, ANPR, RLVD (Red Light Violation Detection), speed detection systems, and ensured synchronization across junctions. • Prepare weekly and monthly progress reports for client and internal management. • Develop and implement a Monitoring Framework to track Equipment uptime and fault incidence.Video stream quality and storage,Traffic violation detection accuracy and Signal synchronization and data analytics output. • Managed end-to-end development of Vehicle tracking software (VTPIS) software including planning, execution, testing, and deployment. • Implement 3rd party integartion of CCTV with the other vms plaform. • Maintain updated documentation: network diagrams, configuration sheets, and test reports. • Support the client in third-party audits, system acceptance, and technical evaluations. • Coordinate with stakeholders, OEMs, vendors, and clients. • Prepare Deviation Reports, Recommendations, and Corrective Action Plans	
E	Name of assignment or project:	Campus Wi-Fi & surveillance system ,BSWAN project
	Objective:	The Campus Wi-Fi and Surveillance Project aims to establish a secure, high-speed wireless network and a comprehensive IP-based CCTV surveillance system across the entire campus to enhance connectivity, safety, monitoring, and digital access for all users.
	Designation:	ICT Expert,PwC
	Year:	2018-2019
	Client:	Board of Revenue, Bihar
	Location:	Bihar
	Activities Performed: • Oversee and monitor the end-to-end implementation of Campus Wi-Fi and BSWAN networks by the System Integrator (SI). • Integration of surveillance feeds with existing campus LAN or ICCC infrastructure. • Preparation of SLA for the BSWAN project	

	- Review Network Design Documents (NDD), site survey reports, and BoQ submitted by the SI. - Ensure deployment aligns with approved architecture, including Core, Distribution, and Access Layer configurations. - Supervise installation and commissioning of Wi-Fi Access Points, routers, switches, OFC backbone, and power systems. - Validate RF coverage planning, SSID management, and bandwidth allocation per user/device. - Verify that network hardware, configuration, and performance meet RFP/DPR specifications. - Conduct periodic inspections and independent testing of network connectivity and redundancy. - Designing and preparation of the RFP for Digitization of Library Record for Boodan Yagna Committee - Preparation of the report including FAT (Final Acceptance Test) and Bandwidth Utilization report in all the BHQ (Block Head Quarter) and DHQ (District Head Quarter) across BSWAN and Campus Wi-Fi. - Designing the AS-IS for the land registrations, proposing the solutions and developing the DPR for the E SCORE application.	
	Name of assignment or project:	SecLAN
	Objective:	To establish a secure and scalable Local Area Network (LAN) that enables seamless data, voice, and video communication across all Secretariat departments for effective e-Governance, coordination, and decision-making.
	Designation:	Project Manager,Planet Infta
	Year:	2017-2018
	Client:	Beltron
	Location:	Patna, Bihar
	Activities Performed: - Prepare project plans, scope documents, timelines, and budgets for LAN upgrades or new deployments. - Coordinate site surveys and requirement gathering with departments and IT teams. - Develop risk mitigation strategies and fallback plans for critical dependencies. - Evaluating criteria for LAN works and AMC services. - Evaluate vendor proposals and support in final selection based on technical and financial merits. - Oversee vendor performance, SLA compliance, and resolution of implementation issues. - Coordinate with internal IT teams, NIC, departments, facility management, and security teams. - Facilitate approvals, escalations, and decision-making from senior government officials. - Conduct user feedback sessions and training as needed.	
	Name of assignment or project:	Implementation of CCTV Surveillance system with emergency system in BMTC project in B'lore with integartion of helpline number
	Objective:	To enhance passenger safety, monitor driver behavior, and prevent theft or vandalism by installing surveillance cameras inside buses, integrated with central command and control centers (CCC).

	Designation:	Project Manager, SS Infrastructure
	Year:	2014-2016
	Client:	BMTC
	Location:	B'lore, Karnataka
	Activities Performed: • Deploying an onboard CCTV surveillance system in all BMTC buses. to enhance passenger safety, operational control, and incident response. • API integration of CCTV feeds and GIS with the vehicle tracking software. • Design and develop VTPIS software and smart Parking • Real-time monitoring, recording, and integration with the Central Command & Control Centre (CCC) for evidence-based decision-making. • Meeting with the stakeholders to gather the functional requirement for the solution. • Design the FRS and SRS document. • Develop the VTPIS software as per SDLC life cycle with agile based method. • Monitor system uptime, storage status, and camera health reports. • Replace faulty units under AMC/Warranty. • Support incident retrieval and video export for law enforcement. • Coordinating the ISO 27001 and Compliance Audit • Implementing SMS based information to the customers 24x7x365 about real time location of bus, ETA / ETD, seat availability. • Implementation web based real time information via web and mobile application to the public	
	Project Name:	DPR for City Sanitation Plan
	Year:	March 2011 – April 2012
	Location:	Tumkur Karnataka
	Client / Org.	Municipal Corporation, Tumkur,
	Position Held	Procurement Expert
	Activities Performed: • Conduct technical, operational, and financial feasibility studies for the proposed project • Assess existing infrastructure, gaps, and project constraints • Evaluate multiple implementation options and recommend the most viable solution • Identify risks, dependencies, and mitigation measures • Prepare Detailed Project Report (DPR) for the City Sanitation Plan. • Prepare official noting, concept notes, and justification documents for internal approvals • Draft approval notes for competent authorities • Support responses to queries, clarifications, and observations raised during approval stage.	

Personal details

Father's Name : Mr. A. G. Prasad
 Date of Birth : 3rd Oct 1980
 Linguistic Proficiency : English, Hindi
 Marital Status : Married

I, the undersigned, certify that the best of my knowledge and belief, this CV correctly

describes me, my qualifications, and my experience. I understand that any wilful misstatement described herein may lead to my disqualification or dismissal, if engaged.
