

Curriculum Vitae

Shailesh Yadav

*Address: - Flat No- 2, Indarpur, P.O –
Mauthnath Bhanjan, Mau, UP
PIN – 275101, Mob. No.- 6306898032,
Email ID: shailesh0895@gmail.com*

Profile Synopsis: -

Dynamic and results-oriented professional with **6 years** of experience in **IT Domains**, committed to delivering high-quality results and driving success through innovative solutions and strategic initiatives.

Technical Service, Smart City, demonstrating expertise across various IT domains in urban infrastructure. Eager to further elevate my career by taking on challenging roles that allow me to contribute my skills in project management, technical support, and urban technology innovation to drive organizational success and personal growth - Experienced **Microsoft Office 365 and Windows Servers** specializing in **Intelligent Traffic Management, Security & Surveillance, Traffic Information & Enforcement, Smart Parking, and Integrated Command and Control Systems** within Smart Cities. Proficient in integrating multiple applications, Implementing multiple type of analytics- **Face Recognition, Illegal Parking Detection, Wrong-Way Detection, Crowd Management, People Flow, Garbage Detection, Animal Detection, Loitering** etc.

Technology Handled /Skills & Core Competencies: -

- **Application Testing and UAT Coordination:** Conduct thorough application testing in accordance with Request for Proposal (RFP) guidelines. Facilitate User Acceptance Testing (UAT) in collaboration with clients, submitting comprehensive documents to address observations within specified timelines.
- **Virtualization Management:** Administer and configure virtual machines using platforms such as VMware, Hyper-V, or others.
- **Microsoft Office 365:** Microsoft Office 365 (Word, Excel, PowerPoint, Outlook, Teams, One Drive, SharePoint)
- **Office 365 Administration** (User Management, Licensing, Security & Compliance)
- **Firewall and Network Expertise:** Demonstrate practical experience in managing firewalls and network devices, including the creation of VPN users and policies to enhance network security.

- **Data Center and Server Operations:** Possess working knowledge of multiple Data Centers and Servers, including Virtual Machines (VMs). Ensure timely updates of security patches to maintain system integrity.
- **Server and OS Configuration:** Execute the installation and configuration of servers, LPUs, and operating systems, be it Windows or Linux, to establish a robust and secure computing environment.
- **Active Directory Management:** Proficiently handle Active Directory (AD) servers, overseeing user management, group policies, and domain control for effective system administration.
- **Client Requirement & Integration:** Proactively update applications based on new client requirements, ensuring seamless coordination with multiple **Original Equipment Manufacturers (OEMs)**.
- **Technical Proficiency:** Strong knowledge of virtualization technologies (VMware, Hyper-V) and Windows Server (2012, 2016, 2019)

Work Experience & Job Profile: -

Vehant Technologies Pvt. Ltd. as Commission Engineer (Technical) From **Date:- 13/05/2024 To Present**

Responsibilities: -

- **Executing Pre-Commissioning Checks:** Verify that all systems are correctly installed and ready for testing. Performing Comprehensive Tests: Conduct functional, performance, and safety tests to ensure systems operate seamlessly and meet performance criteria.
Troubleshooting Issues: Analyze test results to uncover and address any problems, ensuring optimal system functionality.
- **Planning:** Develop detailed commissioning plans and review project documentation.
- **Installation Oversight:** Supervise equipment and system installations, ensuring adherence to specifications and safety standards.
- Deployed an AI-powered surveillance system for real-time crowd detection and management during Prayagraj Mahakumbh 2019 and 2025
- Implemented facial recognition and predictive analytics ensure public safety at large gatherings."
- Deployed a smart alerting system based on AI models to detect anomalies in crowd movement and behavior.
- Implemented real-time analytics and predictive algorithms for parking space availability based on traffic patterns and historical data
- Deployed Smart Parking system Count the vehicle using ANPR and surveillance camera with AI

L&T Technology Services as Engineer (Technical) From **Date:- 17/05/2023 To 07/05/2024**

Key responsibilities include designing user-friendly interfaces, ensuring seamless integration with other technologies, and addressing client requirements through the continuous improvement of application performance. Application engineers play a crucial role in enhancing the overall effectiveness of smart city solutions and ensuring a positive user experience.

Voltech HR Services Pvt Ltd as Project Engineer (Technical) From **Date:- 05/10/2021 To 15/05/2023**

Worked as Project Engineer (Technology and solution) for M/S L&T Construction, Smart world communication and engaged as technical lead for **“Prayagraj Smart City Project – UP”**

Project Detail: -	Implementation (Supply, Design, Build, Operate) of Integrated Command & Control Center (ICCC) in Prayagraj City
Client details: -	Prayagraj Smart city Ltd

Responsibilities: -

- This professional oversees the end-to-end execution of Smart City projects, starting with a deep understanding of RFP requirements, customer needs, and delivery objectives. Responsibilities include the meticulous planning, design, installation, and implementation of diverse smart city components, such as ANPR & RLVD, VMS/DMS, Smart Parking, Public Address, TVDS/RLVD/SVDS, ITMS, and Vehicle Actuated Control systems.
- Active engagement with clients and Original Equipment Manufacturers (OEMs) ensures the successful implementation of modules.
- Collaboration with managers, project engineers, and discipline leads is essential to develop budgets, schedules, and comprehensive plans. The professional is committed to ensuring that each project not only meets but exceeds the established goals, contributing to the overall success of Smart City initiatives.

deployment, and IoT systems/applications. The professional ensures the timely completion of project milestones, including system engineering, design deliverables, code implementation, internal testing, user acceptance testing, roll-out, user training, and sign-off from the customer.

- Additionally, this role involves supporting other project implementations, addressing operational and maintenance (O&M) L2/L3 escalations, contributing to tenders and proposals, participating in **Proof of Concept (PoC)** and demos, and creating reusable components for various smart city systems.

Surevin BPO Services Ltd (We win Ltd) as Technical Support Executive From **Date :- 01/01/2019 To 30/09/2021**

Responsibilities: -

- **Daily Application Monitoring:** Regularly inspect and report on the performance of all applications, ensuring smooth operations on a daily basis.
- **Project Management Planning & Execution:** Emphasize safety and quality control in planning and executing Smart City solutions, managing large projects in the respective domain, and assisting team members.
- **Client Issue Resolution:** Effectively address client issues, respond to queries, and manage response queues to ensure client satisfaction.
- **IT Infrastructure Optimization:** Work towards optimizing IT infrastructure, including ITSM, ATCS, VMS, SWM, ICCS deployment, and IoT application sizing. Maintain a balance between quality and cost-effectiveness in meeting contractual requirements.
- **Coordination with OEMs/Vendors/Operation Team:** Collaborate with OEMs, vendors, and the operation team to stay updated on Smart City services and design progress.
- **SLA Reports Monitoring:** Monitor Service Level Agreement (SLA) reports and submit them to the client on a quarterly basis.
- **System & Application Monitoring:** Oversee the monitoring of systems and applications, including checking server logs, to ensure optimal performance and address any issues promptly.

- **User Training:** Conduct training sessions for end-users to enhance their understanding of smart city technologies, improving overall system utilization and reducing the frequency of user-related issues.
- **System Monitoring and Troubleshooting:** Continuously monitor smart city systems and applications, promptly identifying and resolving technical issues to minimize downtime and ensure optimal performance.

Educational & Technical Qualification Details: -

- **MCA**(Master of computer application From Subharti University) 2020
- **BCA** (Bachelor of computer application) From Chhatrapati Shahu Ji Maharaj University Kanpur 2018
- **Intermediate** From M S HSS B PUR BHAGWANPUR AZAMGARH In 2015.
- **High School** From UP Board (P B S A S F I C High School, MAU) In 2013.

Personal Details: -

Name – Shailesh Yadav

Father's Name – Mr. Ram Bachan Yadav

Nationality - Indian

Marital status - Unmarried

Linguistic ability – Hindi, English

Strength: -

Strive for Perfection, Analytical approach, Responsive, Adaptive and Team Management

Declaration: -

I hereby declare that all the information given above is true to the best of my knowledge.
