Senior Level Assignments in Project Management with a reputed organization

Hand-on expertise in heading overall project ITS activities right from the conceptualization stage to the execution and close out.

PROFILE SUMMARY

- Technically qualified, trained ITS Professional holding **9.0 Years** of rich experience with an intuitive analytical ability to deliver solutions for **Toll Management System, IHMCL Fastag Lane equipments and Networking Issues**.
- Proficient in Toll System, IHMCL Lanes Systems and networking administration and monitoring Toll System & network infrastructure with extensive leading edge delivering satisfaction.
- Proficient in installing, configuring and maintenance of various Toll System & networks by maintaining high standard of up time and performance.
- Efficient in developing processes for capacity planning and optimal network utilization with an impressive track record in consistent achievement of engineering goals and objectives.
- Skilled problem identifier and trouble shooter in coordination with clients to pin point & resolve errors to avoid time expenditures.
- Planning, delivering Technical training to the Engineers.

KEY SKILLS

- | | |
|---|--|
| • Co-ordination with NHAI PIU and RO | • Strategy Planning and Implementation |
| • Timely submission of Plaza Reports | • Excellent Documentation Skills |
| • Interact with Fastag user and provide needful solutions | • Minimizing Performance Bottlenecks |
| • Quality Assurance | • Team Handling / Team Work |

WORK EXPERIENCE

I have 8 years of experience working with PATH India Limited as a Project Network Officer at Allahabad Bypass for the Toll Management System (TMS), and 1 year of experience as an Assistant Manager IT at Ronahi Ayodhya, also for TMS.

ROLE:

- Acted as a Team Leader and managed staff to maintain the TMS and IHMCL system activity.
- Monitoring the installation, up gradation, configuring, scheduling, testing & troubleshooting of all Toll equipment.
- Monitoring the system installation and commissioning of all Toll management equipment of VaaaN Infra. .
- Daily inspection of Toll equipments.
- Monitor the accuracy of the toll system.
- Seriously analyze of Major problems.
- To resolve the issue of HHM (Hardware / Software) and POS ATM.
- Maintain/Prepare DCR, DSR, WTC, WSR, WCR, MSR, MPR and other NHAI related reports
- To maintain all TMS equipment of VaaaN Infra is proper running or not.
- Centralized report for different plazas.
- To maintain the all plaza connectivity.
- Monitoring the IHMCL equipment of all Plazas is working properly or not.
- Check out the IHMCL ETC lane traffic revenue of all plazas separately on daily basis.
- Revise the Toll rate on yearly basis on software as well as road Sine board.
- To provide technical knowledge our engineers at time to time on regular basis.
- Supervision of Installation team for getting the system installation has done in timely manner & meets the required quality standard.
- Coordinating with the Technical Members working in the Project.
- Maintain the communications backbone and the network on the route and within the centers and sub centers.
- Assigning the jobs and monitoring the progress report on daily basis.

HIGHLIGHTS:

- Led a team of 14 members in IT department at Allahabad Bypass for 8 Years which are giving us support to achieve the smooth operation of toll Management System.
- Allahabad Bypass Project (NH-19) comes under distance based price mode plaza. Here 5 No's plazas are exits in a sequence that is KOKHRAJ (Sihori), Nawabganj, Soraon, Sahson and Handia (Sujaula) Toll Plaza with 36 Lanes automatic Toll equipments

and Fastag dedicated va Mixed ETC lanes.

Major Assignments Handled:

- To maintain all the equipment installed on the project to ensure their functioning optimally on a round the clock manner.
- Testing and commissioning of all TMS equipments.
- To maintain adequate inventory of spare and consumables for each system and sub Systems.
- Monitoring of System performance and accuracy on regular basic and updating the same to HO.
- To ensure that all routine and scheduled maintenance activity are carried out on all system and sub systems of TMS as per the equipment manuals supplied by the equipment suppliers.
- Technical Support to Internal users.
- Demonstrating Equipments & Provided training to Operational people.
- Installation, Operation & Maintenance of AVCC (Automatic Vehicle Counter & Classifier).
- Installation, Operation & Maintenance of TLCC (Toll Lane Controller Cabinet).
- Installation, Operation & Maintenance of other devices like automatic Boom Barrier, UFD (User fare display), ETC (Electronic Toll Collection), Fog Light, LSDU(Lane Status Display Unit), LDS (Local Data Storage), OHLS, SSWIM, Static weight bridge and CCTV camera.
- Connected toll Lane system through Server.
- Installation and Maintenance of vehicle profile based AVC (Automatic vehicle classified system).
- Organizing and conducting training programs to client members.
- Handle Incident and Service requests on phone.
- To Maintain spares
- Co-ordination with clients & vendor for spares
- Providing client technical feedback to R & D team.
- Ongoing technical support. to improve system quality

EDUCATION

B.Tech. (2008-2012) : I am proceeding B.Tech. in ELECTRONICS & COMMUNICATION ENGINEERING with 65.46% from HMFA MEMORIAL INSTITUTE OF ENGINEERING AND TECHNOLOGY, HANDIA ALLAHABAD (Gautam Buddha Technical University Lucknow)

IT SKILL

➤ Application Package	:	VaaaN TMS/Infrovate TMS/Office 2003/2007
➤ Language	:	C,
➤ Database	:	MS-Access, Oracle,
➤ Internet Technology	:	HTML, Internet,
➤ Operating System	:	MS-DOS, Windows Xp/2000/Vista/7/8/10, server2003/8/12 ,Linux

NETWORKING

Configuration and maintaining of LAN , crimping, remote connectivity, assigning IP address, managing, local and domain user's account and groups, sharing & permissions, Server Installation (2003/08/12 r2,Linux).
