LinkedIn: linkedin.com/in/sanjay-sharma-b3240b40 | AWS Certified Solutions Architect Associate

Education & Credentials

1. Bachelor of Technology (B.Tech.) in Computer Science & Engineering from Gautam Buddha Technical University (GBTU), with 63%.
2. 12th from MVM Inter College, Kanpur; secured 64%.
3. 10th from MLM Inter College, Kanpur; secured 65%.

Profile Summary

Results-oriented Senior Associate Consultant with over 8 years of experience in IT infrastructure and transformation, specializing in large-scale Smart City and Public Safety initiatives. Currently driving the end-to-end execution of the “**Mukhyamantree Surakshit Sushaasit Shahar (MSSS)**” project, overseeing the deployment of 1,600+ surveillance nodes across multiple district clusters in Bihar.

Professional Experience

Niveshaan Technology Pvt. Ltd.

February 2026 – Present

Senior Associate Consultant

1. Led the implementation of the “Mukhyamantree Surakshit Sushaasit Shahar (MSSS)” project across multiple clusters, overseeing the deployment of 1,600+ high-definition cameras in Group A (Gaya, Chapra, Munger) and Group B (Darbhanga, Saharsa, Purnia).
2. Managed end-to-end operations of CCTV and field devices, maintaining 99.9% up time for critical surveillance infrastructure integrated with the state’s digital governance ecosystem.
3. Directed the integration of Video Management Systems (VMS) and Intelligent Traffic Management Systems (ITMS) to strengthen real-time monitoring and emergency response capabilities.
4. Collaborated with state authorities and technology partners, including RailTel and BSEDC, to ensure project milestones aligned with MSSS objectives.
5. Integrated Face Recognition Systems and Automatic Number Plate Recognition (ANPR) at city entry and exit points to strengthen crime prevention and monitoring.
6. Managed the deployment of environmental sensors and Public Address (PA) systems across 50+ locations to improve citizen communication and emergency broadcasting.
7. Led the testing and commissioning of field devices, including cameras, PA systems, VMDs, and Adaptive Traffic Control Systems (ATCS), ensuring technical feasibility and optimal placement in high-traffic administrative zones.
8. Collaborated with Original Equipment Manufacturers (OEMs) to enable seamless application integration at the data center, aligning server configurations, storage requirements, and VMS software with project specifications.
9. Managed technical coordination with vendors such as Dell, HP, CP Plus, and Honeywell to optimize hardware performance for high-concurrency video processing and data analytics.

Honeywell Automation India Limited

October 2021 to December 2025

Role-Application Administrator

Functional: -

1. Managing End to end Smart Cities Operation at ICCC Datacenter.
2. Installation and commissioning of street-smart light of Tata Smart Light Portal and provide the specific requirement to integrate with UCOP (Unified city operation platform).
3. Strong Coordination with Customer to understand the requirement and deploying Smart city various Platform accordingly.
4. Designing, Planning & Implementing Datacenter shared Resources for Smooth Deployment of Enterprise Software & Future smooth performance.
5. Coordination with SI, OEM, Vendors to smooth and timely Deployment of the Datacenter, ICCC, Field related Component & Applications.
6. Ensure the RFP SLA to Avoid Financial Risk Towards the Organization.

7. Daily, Weekly, Monthly, Quarterly Review on SLA Matrix and Datacenter Security Assessment, Application Performance parameters.
8. Provides cross functional support to New Software Deployment at sites & Provide Feedback in terms of Performance, Features and Use cash.
9. Broad Experience on Enterprise Software Like Honeywell Make: -
 - A- Biometric: -
 - 1-Morpho Manager: - User Management, Device integration (Reader, user finger print sensor (IDEMIA), card etc.), Administration, Access Logs, Reports.
 - 2-Prowatch: - Badge Holder, Badging (Access control, access expiry), Logical devices Management (Readers, access user), Clearance code,
 - B- IVMS/ITMS: Commission, server level troubleshoots, alignment, analytics.
 - C- UCOP(Trinity-Honeywell): Add all field device, Management.
 - D- EMS (MOTADATA): All devices add and report.
 - E- Adaptive Traffic Control (DIMITs)

Technical:

1. Responsible for supporting Linux servers for production, development, and testing VM environment at ICCC Datacenter for ICCC applications.
2. Set up various user profiles, environment variables/security to ensure smooth operation on VM's.
3. Experience in installing local and remote YUM server on Redhat, Centos etc.
4. Co-ordinate with web administrator's team in installation of Application Server and maintain the server according to requirements at ICCC Datacenter.
6. Installing, Configuring and Maintaining the NFS, FTP server.
7. User Account Management, Group Account Management, configuring dumb terminals, adding modems, formatting, and partitioning disks, manipulating swap, taking, and restoring backup, scheduling jobs.
8. Disk management, Logical Volume Management (LVM) and Patrician.
9. Performed administrative tasks such as system startup/shutdown, backups, Documentation, User Management, Security.
10. Troubleshooting backup and restore problems and performed day-to-day trouble shooting for the end users on Linux hosts.
11. Develop, Maintain, update various scripts for services (start, stop, restart, recycle, Cron jobs) Linux based shell and system patching according to end user application.
12. Escalating complex issues or problems beyond their scope to higher-level Application support engineers or system administrators.

Renovision Automaton Services Pvt. Ltd.

May-2012 till Jan-2017(India Institute of Technology-Kanpur)

Role: System Administrator

1. Install, configure, test, and maintain operating systems Like Windows and Linux, application software and system.
2. Proactively ensure the highest levels of systems and infrastructure availability.
3. 4+ year experience in L1 and L2 level support to Monitor and test application performance for bottlenecks, identify possible solutions in CC and Linux lab at Indian Institute of Technology Kanpur (client side)
4. Maintain user management, security, backup, disk-quota, and redundancy strategies.
5. Participate in the design of information and operational support systems on TEQIP and SPO.
6. Managing and monitoring all installed systems, infrastructures, software.
7. SOP, inventory management, roster management.

Tools

Operating system	Ubuntu, Redhat, Centos (7 and 8) and Windows 10
Remote Management	Putty, VNC, Mobaxtream, winSCP, UltraVNC,
Ticketing tool	MOTADATA-NMS
Certification	Solution Associates (Amazon web services)

Industries Skills

1. General knowledge of industry principles
2. High level of concentration and commitment
3. Interact with a wide range of customers and technical issues resolver 20-member team.
4. Maintain technical data reports day to day.
5. Notice problems from a systemic perspective.
6. Quickly learn new technologies.
7. Dedication to problem solving.
