

To,

The Hiring Manager

Subject: *Application for the Position of PMO Lead / Head position*

Dear Hiring Manager,

I am writing to express my interest in the PMO Lead / Head position at your organization. With over 13 years of progressive experience managing large-scale urban infrastructure, digital transformation, and smart city programs for government and PSU clients, I am confident in my ability to establish and lead a high-performing PMO function that delivers measurable results.

In my current role as Project Lead at Awzpack Technology & Services Pvt. Ltd., I have been responsible for establishing PMO governance frameworks, milestone tracking systems, and executive MIS dashboards for national-level programs under the Digital India initiative. Previously, as Project Manager at CMS Computers Limited, I successfully delivered a Rs. 50+ Crore Intelligent Traffic Management System (ITMS) for Indore Smart City — achieving 99.5% post-go-live system uptime, 100% milestone adherence, and zero cost overruns across 10+ vendor contracts.

My core strengths align closely with the demands of a PMO leadership role:

- **Governance & Standardisation:** I have designed and implemented RAID-based risk registers, change control frameworks, and PMO governance structures that reduced risk escalation incidents by 35% and eliminated budget overruns across multi-stakeholder programs.
- **Stakeholder & Executive Reporting:** I have consistently managed 20–50+ stakeholders across government departments, PSUs, and private vendors — delivering structured MIS dashboards and executive-level reporting with zero communication escalations.
- **Financial Oversight:** I have managed CAPEX/OPEX billing cycles totalling Rs. 100+ Crore, ensuring contractual compliance, procurement governance, and financial forecasting accuracy across all active programs.
- **Team Leadership:** I have led cross-functional teams of 65+ members across multiple districts and work streams, achieving 20% faster deployment than planned baselines through structured task allocation and competency mapping.

I hold the Project Management Professional (PMP) certification (renewed December 2025), ISO/IEC 27001:2022 Lead Auditor certification, and am currently pursuing an MS in Data Science & AI — reflecting my commitment to continuous professional development and future-ready program management.

I am eager to bring this depth of experience and a results-driven approach to your organization. I would welcome the opportunity to discuss how my background aligns with your PMO leadership requirements.

Thank you for your time and consideration.

Yours sincerely,

Sandeep Dixit
