ELV & Security Automation Systems Expert

14+ Years of Experience Leading Large-Scale Projects | Specialized in ELV Systems, AV Integration, and Intelligent Building Management Systems (IBMS)

Core Competence

- Security Automation Technology & System Management
- Smart City-Wide IBMS Integration
- Access Control & Identity Management
- Contractor & Vendor Coordination
- Maintenance Strategy Design & Implementation
- End-to-End Project Management
- Stakeholder Engagement & Coordination
- Customer Support & Service Excellence
- Security Audits & Compliance
- Root Cause Analysis & Problem Resolution
- Corporate Security Investigations
- Business Continuity & Risk Mitigation Planning

Passion and Expertise

- Strategic Vendor Contract Management: SLA Oversight & KPI Monitoring
- Integration of Physical Security Systems into Unified Command & Control Platforms
- Transforming Raw Data into Actionable Security Intelligence
- Conducting Technology Surveys & Preparing Detailed BoQs for Security Automation
- Hands-On Experience with Command & Control Platforms: AVEVA, ICONICS, IBM IOC, Lenel OnGuard, Genetec
- Comprehensive Security Risk Assessment & Mitigation Planning

Other Skills and Experience

- Procurement & Supply Chain Coordination
- Team Motivation & Capacity Building for Partner Employees
- OEM Coordination for Technical Query Resolution
- Developed Video-Based Training Modules for Security Automation Tools
- Manpower Planning & Operational Oversight
- Daily MIS Reporting & Performance Tracking
- Proficient in Data Visualization Tools: Microsoft Power BI, Tableau.

Technology Exposure

- CCTV & Video Surveillance: IP-Based & Analog CCTV, NVR, LPR, ANPR, Time-Lapse (Pelco, Samsung, Panasonic, VIVOTEK, Honeywell, Hikvision)
- Video Management Systems (VMS): Genetec, Milestone, VIVOTEK, NUOO, IBM IOC
- Video Analytics & ANPR: IBM, I2V, Vehant; ANPR Systems: NUUO, VIVOTEK
- BMS / SCADA Platforms: AVEVA, ICONICS
- IBMS Integration Protocols: BACnet, Modbus, OPC, API, ONVIF
- Access Control Systems: Biometric Readers, RFID Cards (HID, Lenel, Electron India), Visitor Management, Guard Tour, Time & Attendance
- Fire Alarm Systems: Intelligent & Conventional FAS (up to 10-loop panels), Smoke, Heat, Beam Detectors (Honeywell Notifier, Ravel, Edwards, System Sensor)
- Perimeter & Intruder Detection: PIDS (El-Far, IBEX Gallagher), Intruder Alarms (Vibration, PIR, IR Beam - Tyco)
- Gate Automation Systems: UVSS, Vertical/Drop Arm Barriers, ATB, Tyre Killers, Flap Barriers, Bollards (Gunnebo, Magnetix, Came, FAAC, Cisa)
- Scanning Systems: Baggage Scanners, HHMD, DFMD, SMD
- Electrical Systems: UPS, EDB, Earth Pits
- Integrated Systems: Command & Control Centers, BMS, Public Address Systems, Visitor Management Systems

Career Highlights

Gujarat International Finance Tec-City Company Ltd, Gandhinagar (GIFT CITY) (2021 to Present)

Manager – IT & Communication

Gujarat International Finance Tec City Company Limited (GIFT CITY): - GIFT City is India's first smart city and international financial service center, developed by Gujarat International Finance Tec-City Company Ltd. (GIFTCL), a Government of Gujarat Undertaking. The city offers world-class infrastructure, connectivity, and technology, aiming to become a global financial hub.

Roles & Responsibilities:

- Led the implementation of CCTV surveillance systems, video analytics, ANPR systems, and IBMS (Intelligent Building Management System) across the Smart City.
- Oversaw operations and maintenance of IBMS and technology systems including IP CCTV, access control, boom barriers, fire alarm systems, PA systems, tripods, sensors, and more.
- Reviewed and audited ELV and IBMS system GADs, GFCs, schematic drawings, and DBRs (Design Basis Reports) for developer buildings. Provided guidance on BMS implementation and ensured seamless integration with the GIFT City Master Command and Control Center (C4).
- Ensured 100% compliance with IBMS guidelines by developers within GIFT City.
- Coordinated MEPF audits for developer buildings.
- Facilitated the convergence of physical security systems with technology platforms.
- Managed the City Command and Control Center operations.
- Maintained camera recording systems and provided footage to the security department as required.
- Monitored SLAs and preventive maintenance visits by vendor partners for ELV systems.

- Integrated siloed SCADA systems of GIFT utilities into the City Command and Control Center, creating live, interactive dashboards and delivering KPIs.
- Unified IBMS systems of all operational developer buildings onto a single platform for citywide integration.
- Ensured 100% uptime of City Command and Control Center facilities including video walls, workstations, VMS, BMS platforms, and SCADA systems.
- Managed timely AMC renewals for ELV systems.
- Prepared SOPs for AMC processes, MIS reporting, and other project-related documentation..

TATA STEEL LTD, Jamshedpur (2017 to 2020)
Assistant Manager Security Automation

Integrated Security Solution (ISS) Project

Integrated Security Solution is a mega project worth 22 million USD of Tata steel. ISS aimed at bringing in real time situational awareness by integrating Perimeter Intrusion Detection System (Smart fence installed on 17 km), Access Control, Video Management System with command-and-control platform (IBM-IOC) which is operational 24x7 and ensure suitable response to any security breaches into the premises. It also includes a screening system and Intelligence Platform to carry out predictive analysis.

Roles & Responsibilities:

- Led day-to-day maintenance of security technology systems including IP CCTV, access control, boom barriers, perimeter intrusion detection systems, tripods, bollards, sensors, IBM-IOC, and more.
- Implemented Integrated Security Systems (ISS) at various Tata Steel locations.
- Coordinated regularly with project stakeholders such as IT, Electrical, and Civil teams to track project progress and ensure infrastructure support for installations.
- Ensured proper functionality of automation devices across the plant through preventive maintenance and annual maintenance check-ups.
- Performed root cause analysis to identify problem areas and recommended improvements.
- Supervised and managed daily preventive maintenance activities, liaising with vendors to ensure all operation and maintenance calls were resolved within SLA timelines.
- Proactively reviewed processes and procedures to continuously enhance service quality and support.
- Coordinated with corporate security management and other departments to minimize false alarms.
- Conducted PAC (Provisional Acceptance Certificate) tests, ICT (Integration Cold Tests), and FAT (Final Acceptance Tests).
- Supported daily operations of the Security Control and Command Center and provided guidance to support staff as needed.
- Prepared SOPs for AMC, MIS, and other project-related documentation.
- Compiled weekly and monthly AMC activity reports for senior and executive-level management.
- Managed inventory of security system equipment and generated unique material codes to support stakeholders.
- Planned and managed budgets for security technology systems.
- Ensured uniformity and continuous upgrades of security operations platforms including GATEPASS systems, visitor management, control room management, and SIMS (Security Information Management System).

Highlights: I have led the implementation of highly complex integrated security systems. A USD 22 Million project bringing security policies, automation, and response together for securing the plant. Since implementation, the response times to security breaches has reduced by more than 75%.

**Edelweiss Metals Ltd (Group Company of Edelweiss Financial Services Ltd), Ahmedabad
(2014 to 2017)**

Associate -Electronics System Integrator

Roles & Responsibilities:

- Monitored, operated, and maintained electronic security systems, ensuring the control room and all equipment were consistently in satisfactory condition.
- Maintained operational output of all security automation systems above the desired benchmark of 95%.
- Strictly supervised preventive maintenance schedules and AMC activities.
- Ensured sustainability of security automation systems, improving CCTV camera uptime from 95% to 97% and access control system uptime from 95% to 97%. Conducted audits for critical spares and monitored all electronic systems.
- Maintained updated records of breakdowns and preventive maintenance activities to calculate system uptime accurately.
- Provided operational training to duty officers.
- Continuously monitored OEM websites, updated electronic security SOPs, and coordinated with OEMs for system upgrades.
- Regularly interacted with Head of Security via system entries, emails, and phone calls regarding daily system activities.
- Resolved vendor and engineering management issues related to security projects.
- Reviewed and upgraded all electronic equipment and provided advisory support.
- Designed maintenance strategies, procedures, and methods for routine scheduled maintenance and fault response.
- Oversaw installation of new systems and ensured proper functionality of equipment.
- Monitored and controlled maintenance costs.
- Improved health and safety policies and procedures related to system operations.
- Ensured continuous system coverage during breakdowns.
- Led improvements and further development of the existing control room.
- Reviewed and upgraded SOPs for security systems.
- Achieved full automation of all electronic systems.
- Submitted daily electronic system status reports to the Head of Security

Highlights: -Keeping the sensitivity of the gold refinery plant in view, no major security breach due to security automation system failure or defunct has been reported during my tenure in Edelweiss which itself is a self-speaking achievement.

CYBER INFO ELECTRONICS SECURITY SYSTEM PVT LTD, Ahmedabad (2013 to 2014)

PROJECT CO-ORDINATOR

Roles & Responsibilities:

- Coordinated with the entire technical team to ensure smooth operations and project execution.
- Conducted testing of both analog and IP-based CCTV systems.
- Delivered services to clients as per the Annual Maintenance Contract (AMC).
- Managed order closures and, upon receiving work orders, followed up on material procurement and planned engineer deployment to sites.
- Took updates from technical engineers every two hours to monitor progress.
- Collected daily updates from technical staff for ongoing project installations.
- Provided technical support to engineers when needed, including remote assistance via TeamViewer directly to clients.

- Submitted next-day planning schedules of the technical team to the Technical Head.
- Participated in project planning for new installations with the Technical Head, site in-charge, engineers, and technicians.
- Created project files for newly initiated projects.
- Delivered product demonstrations to clients.
- Prepared and submitted weekly planning reports for technical staff, typically during Saturday meetings.
- Coordinated with various departments such as Production, Stores, and Purchase for project planning and execution.
- Managed a team of over 20 diploma and ITI technicians.

Ami-Tech India Pvt. Ltd, Vadodara (2011 to 2012)

Trainee Engineer -Electronics

Roles & Responsibilities:

- Performed steady-state maintenance and troubleshooting of various electronic instruments.
- Gained hands-on experience in the maintenance of embedded and electronic systems.
- Delivered software and hardware-based solutions for AMR (Automatic Meter Reading) systems.
- Conducted testing, debugging, and troubleshooting of microcontroller-based circuit boards.
- Communicated with the R&D department to report and resolve errors/bugs identified during the testing phase.
- Oversaw installation and rectification activities at multiple locations across Gujarat.
- Reviewed field engineers' reports and MIS data, and shared insights with top management.
- Provided technical consultation and support to field engineers working at various sites.
- Managed a team of over 15 diploma and ITI technicians.
- Coordinated with departments such as Production, Stores, and Purchase for effective job planning and execution.

Education:

- MBA in INFORMATION TECHNOLOGY (IT) & BUSINESS INTELLIGENCE (BI) from Gujarat University (2024)
- Bachelor of Engineering in ELECTRONICS & COMMUNICATION from S.S. Engineering College, Bhavnagar, Gujarat. (2011)
- Diploma in ELECTRONICS & COMMUNICATION from Technical Education Board Gandhinagar, Gujarat. (2008)
- H.S.C. from Gujarat Education Board (2005)
- S.S.C. from Gujarat Education Board (2003)

Professional Courses / Certification

- CCNA- Cisco Certified Network Associate course of Routing and Switching (2017)
- Internal Auditor under ISO 14001:2015 (EMS)
- Internal Auditor under ISO 9001:2015 (QMS)
- Carving a Professional Edge (Dale Carnegie training) (2018)

Academic Industrial Training

Adani Power Ltd., Mundra – (2 Months, 2011)

- Gained hands-on experience in power plant operations and electrical systems within a large-scale thermal power generation facility.

Gujarat Statewide Area Network (GSWAN), Gandhinagar – (2 Months, 2005)

- Acquired foundational knowledge of network infrastructure, data communication, and IT systems in a government-managed statewide network project

Personal Profile

Date of Birth	1 st June 1987
Languages Known	English, Gujarati, Hindi
Nationality	Indian
Marital Status	Married
Present Address	D-506, Sunshine Heights -2, Kudasán, Gandhinagar-382421
Permanent Address	Village-Gamapipaliya, Taluka-Babra, Dist.-Amreli, Gujarat-365410.
